

ACCESSORIES

POWER METER

This optical power meter is compact, light in weight and easy to use quick testing instrument by Star. Quality, value, reliability, accuracy and safety are the promising features of it. This pocket size series provides a large as well as easy to read LCD display that is easy to use and gives a fast response. It does not require warm up as it directly gives you measurement units in dB. It gives you absolute power measurements and has interchangeable fiber optic adapters, including dual way powering system. The internal microprocessor and linear amplifier technology ensure the longtime accuracy. It has damp, dust and shock proof design which makes it safe to use while the auto off function conserves the battery life.

STAR ST9091V

This optical power meter is compact, light in weight and easy to use quick testing instrument by Star. Quality, value, reliability, accuracy and safety are the promising features of it. This pocketsize ST9091V series provides a large as well as easy to read LCD display that is easy to use and gives a fast response. It does not require warm up as it directly gives you measurement units in dB. It gives you absolute power measurements and has interchangeable fibre optic adapters, including dual way powering system. The internal microprocessor and linear amplifier technology ensure the longtime accuracy. It has damp, dust and shock proof design which makes it safe to use while the auto off function conserves the battery life.

FIBERSHOT 9090

This handheld and adjustable optical laser source 9090 presented by Fiber Shot is a new and modern design of fiber optic tester. Fiber Shot offers top quality laser source for testing single mode or multimode fiber networks. It gives you a quick and accurate testing solution on both SM and MM fibers. It bears automatic wavelength identification, USB storage and battery charging function. It comes with a carry case and features interchangeable optical connectors.

STAR FIBER CLEAVER

The Star single fiber cleaver is designed to cleave fibers quickly and precisely. This cleaver will accommodate 0.25mm to 0.9mm coating diameters. The Star cleaver is specially designed to cleave the fiber accurately to 16mm bare fiber length. It is available with a scale, allowing fiber cleave lengths from 5 to 20mm. The quality of cleave depends on skill of the user.

FTTX TOOL KIT

Professional FTTX tool kit by Fiber Shot contains the most essential tools for fiber optic fusion splice, mechanical splicing and patch cord termination. Ideal for fiber optic installation and maintenance jobs. Fiber Optic Tool Kit is meant for optical fiber fusion splicing. It includes all the tools and supplies that are frequently required for cable sheath removal, fusion splicing, testing, cleaning and inspection.
